

To: CAWD

THANK YOU, THANK YOU, THANK YOU for the new sewer pipelines and resurfaced streets. I live on Guadalupe, between 1st and 2nd Avenues and am so appreciative and I'm pressed with the entirety of this project. Your communication was fabulous and your contractors were fabulous, both for the sewer pipelines and the resurfacing. I didn't meet a single employee of the contractors that was anything less than completely polite, courteous, friendly, respectful and doing an excellent job. I maintain one of the street medians and both sets of contractors completed their tasks without disturbing or creating one bit of damage to the median. The sewer pipeline contractor was able to install the new pipeline by going underneath, rather than having to dig into the median. The resurfacing contractor did a beautiful job applying the new surface right to the edge of the median without getting a single drop or splash in the median. Guadalupe Street is now so wonderfully smooth, which I know was so difficult for them to complete because it was so full of potholes and rough edges to begin with. Thank you, again, for investing in the infrastructure of our neighborhood and the City of Carmel-by-the-Sea. Please feel free to share this email with your contractors.
